WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut one 213.5 mm length of 25 x 25 x 2 tube; square the end
that meets the post carefully (it sets the arm level); deburr.
This length suits a phone whose lens is on its centre line across the
width. If yours is d mm off that line, lay the phone with the lens
on the side away from the post and cut the arm d mm shorter.
Side holes, across the side faces, 12.5 mm down from the top:
two 5.5 mm holes 22.5 and 62.5 mm from the post end.
Top-to-bottom holes, on the centre line of the top face:
two 5.5 mm holes 16 and 46 mm from the free end.
Fit: square end against the post's front face, top faces level;
corner plates on both sides; the tray tab under the free end.
Check: both ends square; side holes match the corner plate holes.
