WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut one piece 700 x 450 mm from 4 mm hardboard; sand the edges and round the corners about 3 mm.
Prime both faces and all four edges; paint the smooth face matte light grey (two coats) and the back face and edges any colour.
Rule a 50 mm grid in mid grey from the two centre lines: 13 lines across (the last 50 mm from each end), 9 lines deep (25 from the edges).
Lines about 1 mm wide (a fine paint marker along a steel rule).
Mark the centre of the long back edge with a short line on the edge: it lines up with the base board's centre mark.
Seal both faces and all four edges with clear matte varnish so wet items cannot swell it and it wipes clean; no gloss (glare).
Fit: lies flat on the bench, back edge against the base board's front edge, centre marks lined up. Nothing fixes it.
Check: flat on the bench; no shine under a lamp from the phone's view.
